Jordan Lee

Full-Stack Software Engineer | jordan.lee@example.com | github.com/jordanlee-dev

SUMMARY

Full-stack engineer with 4 years of experience building B2B SaaS products with TypeScript, React and PostgreSQL. Enjoys performance work and developer tooling.

EXPERIENCE

Senior Software Engineer - Ledgerly (fintech SaaS) Mar 2023 - Present

- Led migration of the billing service from a Node monolith to event-driven workers (SQS + Postgres), cutting invoice generation time from 40 minutes to 6 minutes.
- Designed a multi-tenant permissions model used by 1,200+ business customers.
- Reduced p95 API latency by 45% by adding Redis caching and fixing N+1 queries.
- Mentored 3 junior engineers and introduced team code review guidelines.

Software Engineer - Brightcart (e-commerce startup) Jul 2021 - Feb 2023

- Built the checkout flow with Next.js and Stripe, processing about $2M GMV per month.
- Owned product search, implemented with Postgres full-text search.
- Wrote an internal CLI that cut local environment setup from a full day to 20 minutes.

PROJECTS

DevPulse - open-source GitHub analytics dashboard (Next.js, tRPC, Prisma). 800+ stars.
SnapNotes - Chrome extension that summarizes articles using an LLM API.

SKILLS

TypeScript, JavaScript, React, Next.js, Node.js, PostgreSQL, Redis, AWS (SQS, Lambda, S3), Docker, GitHub Actions, Jest, Playwright

EDUCATION

B.Tech in Computer Science - National Institute of Technology, 2021
